IMPORTANT NOTICE

ABOUT "STUNT" DISEASE

Offers of Chrysanthemum cuttings in this catalogue are made without guarantee against any losses the buyer may incur as a result of the epidemic disease known as "Stunt". The cause of this disease is not known, and experiment stations working on the problem have not determined whether it is carried on the plants, or in the growing medium. Every effort is being made to deliver stock which is free from infection, but purchases must be made with the understanding that we assume no responsibility for losses which may result from the "Stunt" disease.

WHEN ORDERING MUM CUTTINGS

Please indicate the earliest date delivery will be acceptable and the maximum number of cuttings that can be handled in a single shipment.

To serve you best, it is necessary that we have your order at least a month in advance of requested delivery date, although often it is possible to make shipment on short notice.

Where we are unable to ship very close to the requested delivery date we will advise you of our growers best estimate of delivery. We suggest you advise whether substitutions will be acceptable when giving the order.

TERMS OF SALE

50 rooted cuttings of a variety is the minimum that can be supplied.

More than 50 of a variety must be in multiples of 50.

The price indicated for the variety will prevail for whatever quantity of that variety is ordered. The size of the Total Order will not have any effect on the price of a variety.

The price of UNROOTED CUTTINGS will be \$1.00 less per 100 than the rooted price.

Two per cent discount permitted on payment within 10 days from invoice date. Sixty days net.

No quantity discounts will be allowed regardless of size of order.

We recommend shipment by Air Freight wherever possible. Air Freight is prepared to serve customers who are close to an airport by phoning them when a shipment arrives and reconsigning shipments via Railway Express to customers who are too far away to pick up shipments at the airport.

Where shipments are not ordered Air Freight they will be sent Railway Express.

CHRYSANTHEMUMS EVERY MONTH

Fundamentals of successful Chrysanthemum culture will probably always remain the same, except, as more progress is made probably we will see more gravel culture. Black Cloth shading for early flowers has become standard practice and as cotton goods become more readily available, we will see even more. Recent experiments by Dr. Kenneth Post at Cornell University have shown it is possible to produce cut Chrysanthemums of good quality at any time during the year by the use of lights and shading. Three crops can be produced in the same bench each year, timed exactly as wanted.

Best varieties for winter flowering were Seafoam, Sunnyside, Valencia, Golden Jane. As further experiments are continued other varieties will be found most suitable for various seasons. We would suggest growers interested in this new development contact your State experiment station. Our propagators are arranging to have cuttings available throughout the entire year for those who wish to follow this program.

DISCLAIMER

1. We make no warranty, expressed or implied, as to kind, description, quality or productiveness of any stock and we will not be responsible for crop.
2. We will not be responsible for any errors or omissions and in no event shall our liability for any claim of loss or damage due to any cause whatsoever be greater than the invoice value of the merchandise. This order, if accepted, is subject to pro-rata delivery if conditions in our sole judgment justify it, either on account of short crop, prior sale or for any other reason. We will not be responsible for delays, damages or loss in transit. Our liability ceases upon delivery to the common carrier. All orders subject to acceptance by home office.

1950 Introductions

BALLERINA

Intermediate pink single. Early cloth house variety and similar in shading response to the California daisies. Better form and color than October Pink and has a more upright growth habit than that variety. Best with some disbudding. Resistant to Verticillium. Excellent for June flowering.

BONTON

Reddish Bronze—Matures approximately October 25th. Responds well to use of black cloth for shading. Resembles the old variety New York but much more productive. A good solid variety.

BOURBON

Intermediate rust bronze single. Very good form and substance. Flowers about the same time as Carnelia. Better growth habit and more productive than Carnelia, for December through March flowering group with Goldsmith, Cameo and Omega.

Br. BROCADE

A Bronze sport of the variety Brocade. We think a good addition to the single or Daisy group of varieties—identical in every way to Brocade except color, which is a good Apricot Salmon or pastel shade of bronze.

BUTTERSCOTCH

Intermediate golden bronze pompon with same season as Cassandra but with an improved growth habit. Very high quality hard pompon. Excellent for the cloth house when the competition is keen.

CHAMPAGNE

Intermediate yellow single. A freer grower than Lodestar and about the same season. Responds with Goldsmith and Sunnyside when lighted for December through March flowering.

CINDERELLA

Intermediate yellow single flowering in Yellow Cameo season. No tendency to blindness. Crowns readily, producing well on compound sprays. Can be flowered with Omega and Yellow Cameo from December through March.

CRYSTAL BEAUTY

(DePetrus) A large solid pure white pompon with general all round perfection. Good sprays on strong petioles. Stem tall and vigorous. Foliage somewhat large. Matures November 25-30.

Dark PINK RIVIERA

Identical with Riviera except in color which is much deeper.

DEFIANCE

(DePetrus) Large glowing, true Orchid Pink pompon of decorative type with a green immature center making a very pleasing color. Excellent free growth and good production. Matures December 20-25.

ECSTASY

Deep Lavender — slightly larger than the Dot varieties, responds well to shading, a good productive free growing variety.

ENCORE

Intermediate pure white pompon to flower with Little America and Sea Gull in the shading program. A more satisfactory variety than Vesper and is excellent for late September and October in the cloth house.

FESTIVAL

Small red single for Thanksgiving. Also now being flowered from December through March. The earliest of a group of outstanding red singles in which the growth habit and production is greatly improved over that of varieties listed in the past.

FORTY-NINER

High quality yellow round Pompon. Flowers November 15th. A very satisfactory cloth house variety. A good variety to be cutting when the competition is tough. Yellow Bushnell quality in Yellow Fellow season.

GALAXY

Intermediate bronze single. Same season as Viking and Cavalcade with an improved growth habit. Useful shade of bronze when lighted for the Winter program.

GOLDEN CHORD

Intermediate golden yellow pompon. The variety ranks with Gold Coast and Sunnyside and flowers about November 10th.

GOLDEN HARVEST

(DePetrus) Deep gold small Pompon. Matures from the end of November into the 1st week of December. Has excellent growth and substance. A fine productive variety which keeps exceedingly well on the plant or after being cut.

HOLIDAY

Intermediate wide petaled red single flowering for Christmas. Freer growth habit than Sarong and therefore better suited for Winter flowering than Sarong.

INDAGOLD

Deep Lemon—medium size Pompon. Matures approximately November 1st. Responds well to use of black cloth for shading. We think a good variety to add to your shading list.

MERRYMAKER

Crimson red single for the holiday season and for flowering through January, February and March. A little larger and a better flower form than Christmas Star.

MOONGLOW

Intermediate white pompon. Fine for October and November flowering. Its natural season follows that of Vesper and finishes just ahead of Seafoam and Priscilla.

POPCORN

Intermediate white pompon flowering with Pinocchio. Outstanding white cloth house variety. Responds with Gold Coast. Has consistently outproduced all other varieties. The flower is completely double. Very resistant foliage. Clean upright growth habit.

PRISTINE

Early intermediate pure white Pompon. Responds with Irene for July and August flowering. At its best when period from pinch to shade does not exceed 28 days. Does not spot. The best white for the earliest shadings in the cloth house.

PURDUE

Incurved — Deep Lemon — Matures approximately November 20th, a new addition to the large standards which we think shows promise.

QUEEN'S LACE

Early white spider. Responds with Silver Sheen and does well in the year round flowering program from April to November. It should receive the same cultural treatment, spacing, etc., as Silver Sheen. A very durable flower. Has been very much in demand for June weddings this past season.

RED SUPREME

Sport of Br. Supreme, not a true red—slightly deeper in color than Br. Goldsmith, a good addition to the Supreme varieties and anyone who grows the Supreme varieties should include this one.

RUBICON

Early bronze red decorative to flower with Mary McArthur in July, August and early September. Superior color to Seneca and Red Rust during the Summer period.

SAMOVAR

Rosewood bronze decorative, flowering at the same time as Red Rust, both natural and in the shading program. A good variety for September and October flowering.

SILVERSMITH

Large very pure white decorative, immediately following Cameo. Strong, free growth with no tendency toward blindness. Responds with Goldsmith and Omega in the Winter flowering program from December through March.

SNOWCAP

Intermediate formal type white pompon for Christmas and for January and February flowering. Growth habit an improvement over Snow and Revelation.

SNOWCREST

(DePetris) An intermediate solid white pompon with a green immature center, full rounded form and excellent substance. A fine and nice growing variety which matures December 10-15, making it useful for a much desired white pompon at that season. A good keeper and quite productive.

SOPRANO

Intermediate pink single to follow Ballerina in both the shading program and natural season. Fine for April, May and June flowering with Little America and White Mensa.

STARBRIGHT

Early intermediate golden yellow single, flowering with California Yellow Daisy. Excellent for the cloth house and May and June flowering in the greenhouse.

YELLOW REVELATION

This variety should need no description—a sport of the well known variety Revelation, identical to Revelation in everything except color.

OUTSTANDING SPORTS OF WELL KNOWN VARIETIES

Yellow L. I. Beauty (Bussian Bros.)

Pink L. I. Beauty (Fred Laisy)

White Valencia (Robert Semran)

Yellow Riviera (C. R. Perkins & Son)

Bronze Riviera (Mikkelsen & Sons)

Yellow Cassandra

VITA-BANDS

For stronger, finer and earlier blooms start MUMS in Vita-Bands. Be ahead of the market with quality blooms from healthier plants.

Vita-Bands are nutrient-treated. Convenient and easy to handle, they cut labor costs and raise bench production.

Vita-Band 40 for growing periods of approximately 40 weeks.

Vita-Band 10 the low cost band for shorter growing periods of approximately 10 weeks.

PRICES PER THOUSAND					SIZES IN INCHES			
Sold in Units of 1000 Bands only.								
Vita-Band	1½x1½ x2½	1¾x1¾ x2½	2x2 x2½	2x2 x3	2½x2½ x3	3x3 x3	4x4 x3	4x4 x4
